Contact with liquid can freeze tissue, similar to thermal burn. May cause frostbite.

Inhalation - not considered carcinogenic. Variable simple asphyxiant anesthetic.

Ingestion – Product does not lend itself to ingestion. Skin – No absorption through the skin.

Signs and Symptoms of Exposure:
(Non toxic but may displace oxygen in air). No apparent ill effects in breathing conc of 5% for 2 hours. Causes drowsiness in a short time in concentrations of 1%.

Medical Conditions:
Generally Aggravated by Exposure
Respiratory related chronic illness (i.e. asthma, etc.)

Notes to Physician:
Simple asphyxiant / Frost bite.

Section VII – Precautions for Safe Handling and Use

Steps to be Taken in Case Material is Release or Spilled:
Remove all Ignition sources. If applicable stop leak. Disperse vapors with water spray.

No smoking, flames or flares in hazard area.

Isolate hazard area and deny entry of non qualified emergency response personnel.

Waste Disposal Method:
Dispose of product in accordance with applicable local, state and federal regulations.

Precautions to be Taken in Handling and Storage:
Product is highly flammable and forms explosive mixtures with air, oxygen and all oxidizing agents. Avoid high temperatures that may elevate component pressure above container rating.

Other Precautions:
Use and store this product with adequate ventilation; use non sparking tools; electrically ground all equipment and lines; use explosion proof equipment. (Class I Group D, Division 1 & 2)
